BERKHAMSTED DENTAL PRACTICE Caring for your family's teeth

Merry Christmas & A Happy New Year,

from all of us at Berkhamsted Dental Practice. We now send our Christmas Newsletter only by email. If we don't have your up to date email address please let us know at reception or at info@berkhamsteddental.com. Similarly if you wish to unsubscribe from further newsletters, please let us know.

Please excuse how we look!

We are continuing to refurbish the practice and have recently upgraded our digital X ray system which improves our ability to show you any problems with your teeth. Over the December weekends we will be decorating the hallway & landing so please bear with us if we don't look our best for a few weeks!

The practice will close in the afternoon on Friday 23rd December and re-open at 9am on Wednesday 28th December. The practice will also be closed on Monday 2nd January as it is a Bank Holiday.

If you should experience a dental emergency over the holiday period please phone the practice on 01442 865646. Our answer phone will give details of how you can contact the Hertfordshire Out Of Hours Dental Service for advice. There is also information on dealing with dental injuries on our website www.berkhamsteddental.com, or use our QR code below:

Dental Nurse Louise had a baby boy in May this year. We are pleased to say baby Charlie is doing well and we look forward to welcoming Louise back to work in the Spring.

Specialist Dentistry.

We offer a broad range of routine and advanced dental care at Berkhamsted Dental Practice. Partners Claire Rogers and John O'Grady are specialists in Paedodontics and Prosthodontics respectively. We also refer patients to visiting specialists Giles Kidner (orthodontist) and Philip Mitchell (endodontist) who operate their specialists practices from our premises in Lower Kings Road.

Dental Nurse Caroline joins the team in December. We are delighted to welcome her to the practice.

Paedodontics is dentistry for Children. Claire can provide a range of treatment for children and young people including those who have special needs or are anxious about seeing a dentist.

Prosthodontics is the replacement of missing and damaged teeth. John can provide a range of crowns, veneers, bridges and dentures. He can also provide advice about implants.

Orthodontics is all about straightening crooked teeth. Giles can provide a range of braces including various "invisible" options.

Endodontics is the science of root filling teeth. Phil can carry out root fillings and surgery to help preserve teeth where the nerve has died or become infected. Without such treatment these teeth would need to be extracted.

We are always interested to hear what you think of us, the practice & the services we offer. It's always nice to hear if you are happy with your treatment and we would like to include testimonials from our patients on our website. If there is anything you are unhappy with, or think we can improve, we are even more interested to hear your views!

You are welcome to speak to any member of the practice team, we have comments slips available at reception and you can contact us at info@berkhamsteddental.com
